PROFESSIONAL SUMMARY

Electronics and Communication Engineering graduate with internship experience at ISRO Propulsion Complex developing production-grade real-time telemetry systems. Skilled in Python, SQL, AI technologies, embedded systems, and scalable software development, with a strong interest in machine learning and data engineering.

TECHNICAL SKILLS

Languages	Python, SQL
AI / ML	LangChain, CrewAI, LangGraph, FAISS, Transformers
Backend	Node.js, Express.js, FastAPI, REST APIs
Databases	MySQL, SQLite, PostgreSQL, MongoDB Atlas
Libraries	Pandas, NumPy, Matplotlib, Seaborn
Developer Tools	Git, GitHub, VS Code, Jupyter Notebook
Real-Time Systems	Multithreading, UDP, Socket Programming, Queue Buffering, Failover Architecture
Embedded Systems	Raspberry Pi, GPIO, Sensor Interfacing

INTERNSHIP

ISRO Propulsion Complex (IPRC), Mahendragiri, Tamil Nadu

Jan 2026 – Mar 2026

Project Trainee – Mission-Critical DAQ & Real-Time Telemetry Systems

- Engineered a production-grade dual-redundant telemetry monitoring system using multithreaded UDP communication, queue buffering, and automated failover for uninterrupted propulsion engine testing.
- Developed a real-time telemetry visualization system with watchdog-based health monitoring, circular buffering, CDT timestamp synchronization, and continuous waveform rendering, achieving zero data loss during failover.

PROJECTS

KnockKnock — Doorstep Mobile Repair Platform

HTML | CSS | JavaScript | Node.js | MongoDB

[Website](#) | [GitHub](#)

- Designed and deployed a production-ready doorstep mobile repair platform with a responsive frontend, secure Node.js/Express backend, MongoDB Atlas, HTTPS, and GitHub-based CI/CD.
- Implemented WhatsApp booking integration, REST APIs, and cloud-based service request management for real-world business operations.

Multi-Agent AI Business Assistant

CrewAI | LangGraph | FastAPI | LLMs

- Built a multi-agent AI automation platform using CrewAI and LangGraph with specialized Researcher, Analyst, Writer, and QA agents.
- Integrated FastAPI-based asynchronous workflows, tool-enabled agents, and structured business intelligence pipelines.

AI Resume Screening & ATS Analyzer

Python | LangChain | FAISS | Transformers

- Developed a RAG-based resume screening system using LangChain and FAISS for semantic job description matching and ATS score estimation.
- Automated candidate ranking, skill-gap analysis, and PDF report generation using LLM-powered workflows.

Manufacturing Analytics Dashboard

Power BI | PostgreSQL | Python | SQL

- Developed an enterprise Power BI dashboard for OEE, production throughput, equipment utilization, and defect-rate analytics.
- Built Python ETL pipelines and optimized SQL queries, reducing dashboard response time by approximately 65%.

EDUCATION

Government College of Engineering, Dharmapuri

2022 – 2026

B.E. Electronics & Communication Engineering

CGPA: 7.4/10
